

Flower Craft Instructions

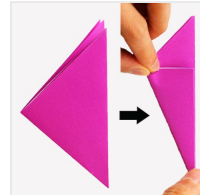

1. Make a paper square.

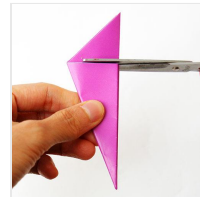

2. Fold the square diagonally in half to create a triangle. Do it again. Now do it one more time!

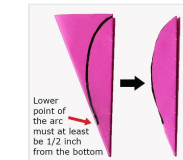

3. Rotate your triangle so that your triangle points to the left and the folded side is closest to you. Fold the corner on the left so that it lines up with the long side on the right.

4. Cut just above the line you created when you made that last fold.

5. Draw an arc on your petal and cut. Different arcs will create different shaped petals!

6. Unfold the paper and add a circular center. Repeat steps 1-6 until you have a whole bouquet!

7. Give a flower to someone you love!

More Ideas: Layer two or three flowers on top of each other!
